

Holland Bloorview

Kids Rehabilitation Hospital

Conducting innovative research programs aimed at improving outcomes and quality of life for children with autism

Has your child been diagnosed with an autism spectrum disorder (ASD, autism, PDD-NOS, or Asperger's syndrome)?

Is your child between 5-12 years of age?

We are currently conducting clinical trials to investigate whether **Pioglitazone** (study drug) helps to decrease symptoms of Autism Spectrum Disorders, specifically **social functioning, repetitive behaviours and hyperactivity.**

Appointments in Toronto are required every 2-4 weeks
