

Holland Bloorview Kids Rehabilitation Hospital

- Has your child been diagnosed with Autism Spectrum Disorder?
- Is your child between **5-7 years** of age?
- Is your child having difficulty with eating and **eats less than 20** different foods?

We are conducting a clinical trial to investigate whether **Sequential Oral Sensory (SOS)** intervention (study intervention) helps to **increase the number of foods eaten** by children diagnosed with Autism Spectrum Disorder.

For more information, please contact Research Coordinator (Adriana Munoz) at Holland Bloorview: 416-425-6220 ext. 3002
